What happens to the temperature as you go deeper in an aquatic system

This chart shows the annual catch statistics for the red grouper for the state of North Carolina during the 1990's. Red grouper begin their lives as females, and the largest fish change sexes to become male during mating season. Only large females mate with these males and lay eggs. You are a fisheries biologist for the state of North Carolina. You are charged with protecting the fish population, while also keeping professional fishermen from losing their jobs. Based on the chart above, what would you conclude and what would your solution be?

290 is 10 times as much as 2900

Given the trinomial $5x^2 - 2x - 3$, predict the type of solutions. Two rational solutions

One rational solution

Two irrational solutions

Two complex solutions

The volume of a cube depends on the length of its sides. This can be written in function notation as $v(s)$. What is the best interpretation of $v(2) = 8$?

In most organizations, the rumor mill tends to be particularly active when ____

Civil rights advocates fought for the reform of all of the following policies and practices except _____.

A. racism

B.

segregation

C.

integration

D.

Jim Crow laws

How many favourable outcomes are there when rolling 5 dice?

In a cell water always move to reach an equal concentration on both sides of the membrane true or false

How does population growth negatively impact water quality?
