

After a rapid change in climate, one population of bird quickly adapts to the change, but others in the area do not. what could you conclude about the quickly adapting population?

They are going to reproduce so that their genes will pass on to the next generation, therefore more of the species surviving. Also, they all share the same gene that allows them to survive in their setting.

Read the paragraph. What is the major fault of this paragraph? During our summer vacations, we would always go to our cabin by Lake Henson and Butterfly Creek. These summer vacations were always fun and relaxing. All summer, we would take hikes, photograph the wildlife, and swim in the river. Summer smells, summer flowers—these are my memories of summer vacations at our cabin during those years.

A spelling mistakes

B sentence fragments
