

What is the first step in solving this equation? $3(2x + 6) - 4x = 2(5x - 2) + 6$?

Distribute the numbers in the parenthesis on both sides.

$$3(2x + 6) - 4x = 2(5x - 2) + 6 \rightarrow$$

$$6x + 18 - 4x = 10x - 4 + 6$$

Answer:

Use the distributive property on each side of the equation.

Step-by-step explanation:

From which person did Thomas Jefferson draw many of the ideas presented in the Declaration of Independence

Is 3.4 a whole number

An object is dropped from rest from the top of a 400 m cliff on Earth. If air resistance is negligible, what is the distance the object travels during the first 6 s of its fall?

Historians argue that the ideas of manifest destiny impacted all relations between the united states government and native americans in the 1800s. Manifest destiny can best be summed up as

True or false Costa Rica is land is protected by one of the most ambitious conservation programs in Central America

List the following units in order from largest to smallest: m³, mL, cL, uL, L, dL?

What is 1000^3 ? Please help

A plane flies directly between two cities, A and B, which are separated by 2300 mi. From A to B, the plane flies into a 65 mi/h headwind. On the return trip from B to A, the wind velocity is unchanged. The trip from B to A takes "65 min less" than the trip from A to B. What is the airspeed of the plane, assuming it is the same in both directions?

A _____ is a founding document that provides direction for a country's laws and government.

A state with a roughly equal number of democrats and republicans in the population is often referred to as a _____ state.

How do you round the answer to the nearest hundredth by doing $1062.98 * 0.092$?

Why is it important to control body temperature?

What is larger $\frac{8}{10}$ or $\frac{63}{100}$

Aluminum is a group 3a metal. which ion does a1 typically form?

Luis earns a base salary of $\$150.00$ every week with an additional 14% commission on everything he sells.

Luis sold $\$6050.00$ worth of items last week.

A two dimensional figure made from two or more geometry figures

John sat down with the project sponsor to gather information needed before drawing up the project plan. He knew the budget, the schedule, and the project objectives. What key piece of information was still missing? A. How many people would be involved?
