

**1. Marine scientists get information about aquatic populations from which of the following sources? - news reports**

- helicopter pilots**
- commercial fishermen**
- individuals on the beach**

**2. Countershading is an example of**

- a trait unique to sharks**
- a technique used for hunting**
- an adaptation to the environment**
- the issue created by light in the ocean**

**3. Phytoplankton is the first link in the food chain.**

- True**
- False**

The answers, in order, are Commercial Fisherman, A technique for hunting, and if the sun is part of it, than it is false, if not, it is true... (I would go with True myself though)

I hope this helps!

Answer:

1. C

2. C

3. TRUE

Explanation:

a If you dissolve 10 grams of sugar in 30 grams of water, you will make \_\_\_\_ grams of \_\_\_\_% sugar syrup.

Which item has the most potential energy (assume they are all at the same height and mass

Instructions:Select the correct answer. Which statement best summarizes this excerpt from Leo Tolstoy's The Death of Ivan Ilyich? And in imagination he began to recall the best moments of his pleasant life. But strange to say none of those best moments of his pleasant life now seemed at all what they had then seemed—none of them except the first recollections of childhood. There, in childhood, there had been something really pleasant with which it would be possible to live if it could return. But the child who had experienced that happiness existed no longer, it was like a reminiscence of somebody else. Ivan Ilyich couldn't recall the days he spent as a child. Ivan Ilyich could recall pleasant days only in his childhood. Ivan Ilyich is thinking of someone's pleasant childhood. Ivan Ilyich had a pleasant adult life but an unremarkable childhood.

If the pressure of a gas is 2.42 arm what is it's pressure in kPa ? 0.00318 Pa 0.0239 kPa 245 kPa 1840 kPa

$7 \frac{5}{6} \div 2 \frac{2}{3} =$

Need to know steps to get answer.
