

Why do farmers in different regions use different farming techniques

Answer:

The farmers in different regions use different farming techniques in order to comply with the regional climatic conditions, weather, the fertility of the soil, etc.

Explanation:

- The farmers need to devise farming techniques depending upon factors like the climate, weather, availability of resources, type of soil, the fertility of the soil, the desired outcome, etc.
- Farmers that have vast agricultural lands and crops spread over a large area need to practice mechanized farming, whereas, farmers with a limited land area need to practice manual farming.
- The use of fertilizers, insecticides, pesticides, etc., also depends upon the factors listed above. Thus, farmers in different regions use different farming techniques.

It all depends on the soil. Like down in Florida, the soil is a lot more sandy than it is in the mountains of the northeast. So in the northeast, you have to break up the soil a lot more in order to plant something.

Between which two rivers was Mesopotamia located?

Carmen has two books of 20 stamps and four books of 10 stamps how many stamps does Carmen have?

An airplane is flying at an altitude of 3000 feet . The pilot dives 630 feet and then rapidly climbs 1048 feet. The pilot then dives 888 feet before making another climb of 1067 feet. Again 888 feet before making another climb of 1067 feet. How far above the ground is airplane ?

In the early years of america, why was the education of children not much of a priority?

Kym spends an average of \$78 per week on groceries. She can save 10% of her total grocery bill by joining the store's free shopper's club. About how much money will Kym save in a year (52 weeks) if she joins the shopper's club

Bob and Joe both donated money to the same charity. Bob gave three times as much as Joe. Between the two of them, they donated \$280. How much money did Joe give?

A tall glass can hold 750 cm³ of water. A bottle can hold twice as much water as the glass. A jug can hold four times as much water as the bottle. what is the total capacity of 3 such bottles and 4 such jugs?

A flashlight bulb operating at a voltage of 4.5 V has a resistance of 8.0 W . How many electrons pass through the bulb filament per second ($e = 1.6 \times 10^{-19} \text{ C}$)? Solve the equation for the indicated variable:

(F-7)/g=h For F

what natural resources have made Algeria, Libya, and Egypt very wealthy. select all that apply. A. gold B. natural gas C. salt D petroleum

C is more than half of n

Profit earned by the colonists from selling crops to European buyers would most likely be spent on exotic crops and plants from Africa

raw timber for building new structures

machinery from Canada to increase profits

manufactured goods from Europe like cloth

To make a music video, Juan plays 2 1/3 video clip 1 1/2 Times. How long is Juans music video?

An infant randomly makes many vocalizations throughout the day. Some of her vocalizations elicit no response from her parents, but several elicit laughter and hugging from her parents. Eventually, she increases how frequently she makes those vocalizations in order to elicit laughter and hugs through which type of learning?

Suppose Jim is a brilliant attorney who can draft especially persuasive legal briefs. He also happens to possess some excellent administrative skills such as typing, filing, assembling binders and notes, and making reservations. Which best describes whether Jim should hire an administrative assistant to help him?

Define sustainability from an Environmental Science point of view and explain its importance.

Your mother wants to purchase a large hard drive for her computer and asks you to see what type of drive interface she has. Her computer has a gray ribbon cable that encases 40 pins what type of drive does she have

Which of the following is not a reason why a high dependency rate leads to low levels of social welfare?

1. [Home](#)
2. [More Solution](#)
