

Let's Check In Which formula is used to indicate simple past tense?

A. verb + -ed

B. verb

will + verb

D. have + verb + -ed

Please select the best answer from the choices provided

Answer:

The formula used to indicate simple past tense is verb + -ed (A)

Describe how an ECG can help an informed individual determine the health of the heart.2) If an individual is experiencing a heart rate of 30 beats per minute and a P wave is missing in the ECG reading, what might be a logical conclusion about this individual's heart?

What actions were taken to accomplish women's suffrage?

A bird leaves its nest and travels 18 miles per hour downwind for x hours. On the return trip, the bird travels 3 miles per hour slower and has 5 miles left after x hours. What's the distance of the entire trip? How long does the entire trip take?

How did conditions for African Americans in the North differ from their circumstances in the South?

Transport of large boulders along the bottom of a riverbed

What city is famous for having more bicycles on the road than cars?

Ecrivez chaque verbe à l'imparfait. Les voyageurs a1 (porter) des ceintures fléchées.

Ils a2 (avoir) plusieurs façons d'employer leur ceinture.

Il a3 (voyager) en canot.

Ils a4 (travailler) pour la Compagne du Nord-Ouest.

The sale price of a suit after a 30% discount was \$140. What was its original price?

The fastest speed a table tennis ball has been hit about 13.07 times as fast as the speed for the fastest swimming. What is the speed for the table tennis ball the coordinates of the vertices of a quadrilateral are R(-1,3), S(3,3), T(5,-1), and U(-2,-1). find the perimeter of the quadrilateral. Round to the nearest tenth.

A sample of nickel is heated to 99.8 degrees C and placed in a coffee cup calorimeter containing 150.0g water at 23.5 degrees C. After the metal cools, the final temperature of metal and water mixture is 25.0 degrees C. If the specific heat capacity of nickel is 0.444J/(degreesCg), what mass of nickel was originally heated?

For their CD collections, Alan, Tom, and Barbara have a total of 52 CD's. If Barbara had 6 more, then she would have as many as both of the boys together. Tom has three more CD's than Alan. How many CD's does each of the three have?

Which helps in counting the age of a tree? A.

Rings seen in the stem

B. Height of the tree

C. Width of the tree?

Staci is attending a music festival. The ticket to the festival costs \$87.96. Staci plans to purchase \$30.00 t-shirts from the event for her close friends. She is taking \$200.00 to the festival. What is the maximum number of t-shirts Staci can purchase??

$7a^3+56b^3$ factorize it plsss?

1.. The smallest level of organization in living things is

The atom.

The cell.

The small tissue.

The nervous system.

2.

A group of cells working together make up a(n)

Organ

Organ System

Tissue

Molecule

3.

An organ system is made up of

A group of organs working together.

A group of tissues working together.

A group of atoms working together.

A group of cells working together.

4.

An organism is made up of

A group of cells working together.

A group of tissues working together.

A group of organ systems working together.

A group of atoms working together.

5.

All of the following are a part of the cell theory except

All organisms are made of cells.

All cells come from other cells.

All cells are exactly the same.

Cells are the basic unit of life.

6.

Which of the following is a unicellular organism?

A turtle

A flea

A cat

A bacteria

7.

An organism that contains multiple cells is known is correctly known as a

multicellular organism.

multi-tissue organism.

several cell organism.

multiple cell organism.

8.

The process of cells dividing into new, identical cells is known as

Mitosis

Cellular replication

Homeostasis

Cell birth

9.

Which of the following is not true of cells?

Cells are living.

Not all cells are the same.

Some cells are living and some cells are not.

Cells have the seven properties of life.

10.

Organelles in cells are similar to _____ in humans.

Atoms

Nerves

Organs

Cells

11.

This organelle contains the information to run the cell.

DNA

Nucleus

Vacuole

Mitochondria

12.

Which of the following organelles is found in plants cells but not in animal cells?

Cell membrane

Cell wall

Nucleus

Mitochondria

13.

Which of the following organelles is responsible for breaking down food into energy?

Nucleus

Cell Membrane

Mitochondria

Endoplasmic Reticulum

14.

The cell membrane helps maintain _____ in the cell by controlling what comes in and out of the cell.

Proper organelle levels

Homeostasis

Proper size

Temperature

15.

What is homeostasis?

Homeostasis is when cells extract energy from food.

Homeostasis is when cells maintain internal balance.

Homeostasis is when cells grow.

Homeostasis is when cells reproduce.

16.

The _____ system is responsible for protecting the body against infection.

Immune

Respiratory

Circulatory

Nervous

17.

Which body system is responsible for bringing oxygen into the body?

The Digestive System

The Respiratory System

The Circulatory System

The Musculoskeletal System

18.

The _____ system extracts energy from food.

Circulatory

Respiratory

Musculoskeletal

Digestive

19.

The nervous system is responsible for

delivering oxygen to the body.

moving blood around the body.

passing information from the brain to the rest of the body.

fighting off disease.

20.

Which body system is responsible for transporting nutrients to the different parts of the body?

The Digestive System

The Respiratory System

The Circulatory System

The Musculoskeletal System

21.

Viruses are the only infectious agents that are

living.

deadly.

not living.

naturally occurring.

22.

Which of the following is a way your body fights a bacterial infection?

Fever

Shivers

Sweats

Increased heart rate

23.

Which of the following levels of classification is the least specific?

Domain

Kingdom

Class

Species

24.

Domains are broken down into

Species

Class

Phylums

Kingdoms

25.

Which level of organization is the largest?

Domain

Kingdom

Genus

Species

On May 5 of the current tax year, Byrne purchased a patent that qualifies as a § 197 intangible. The cost of the patent was \$207,000 and Byrne is a calendar-year taxpayer. In the current tax year, how much of the patent's cost may Byrne amortize? a. \$1,150.

b. \$4,600.

c. \$9,200.

d. \$13,800.

e. None of the above.

what is the surface area of a rectangular prisim with a base length of 9 yd, base width of 7 yd,and a height of 4 yd?

1. [Home](#)

2. [More Solution](#)
