

**the graph shows the relationship between the volume of a rectangular prism and the volume of a square pyramid with an identical base and height what is the slope of the line?**

Answer:

The answer is  $\frac{1}{3}$

Answer:

The difference in volume is that the prism's volume is 3 times greater than the pyramid's volume.

Without seeing the graph, I can't tell what the slope is, but depending on the way the graph is drawn, the slope should be  $\frac{1}{3}$  or 3.

Managing information effectively can result in better service, as well as increased security, collaboration, and what else?

Which activity helps develop muscular endurance? 1.going for a walk

2.playing tennis

3.rowing

4.ballet

At the grocery store you can buy a whole chicken that weighs 4 pounds for \$3.88. You can also buy a package of chicken drumsticks that weighs 3 pounds for \$3.06. Use the unit prices to decide which is a better buy.

A light and tone (CS) may be turned on at the same time and associated with an unconditioned stimulus such as food. The most salient property of the compound stimulus will come to regulate exclusively the conditioned response. For example, if a loud tone and a faint light were used as the compound CS, then the tone may elicit salivation while the light may not. In this case, the tone is said to \_\_\_\_\_ conditioning to the light.

Having the support of family in friends is the key factor in \_\_\_\_ ?

Maren received 11 NQOs (each option gives her the right to purchase 12 shares of stock for \$9 per share) at the time she started working when the stock price was \$7 per share. When the share price was \$16 per share, she exercised all of her options. Eighteen months later she sold all of the shares for \$21 per share.

How much gain will Maren recognize on the sale of the shares and how much tax will she pay assuming her marginal tax rate is 37 percent?

Established during the Middle Ages, guilds were associations of skilled artisans designed to institute quality standards, establish training programs, and set prices in industries such as glassblowing or masonry. What most likely happened to the guild system following industrialization?

- In this context, the word “session” refers to \_\_\_\_\_. A.) The period of time between opening and closing a web browser.  
B.) The period of time between connecting and disconnecting as two computers communicate.
