

Type the correct answer in the box. Oxygen is in group 16, and it has

v

alence electrons.

Reset

Ne

Answer: 6 valence electrons

Explanation: the valence electrons and group are always the same, but when the group numbers are 10 and above, they would be the first number. For example, every element in group 16 has 6 valence electrons.

Which one is a true statement about exothermic reactions? A. Energy from an outside source is continuously being added. B. The reaction container always feels cold. C. The reactants have more heat energy than the products. D. More heat is given off than is put into the reaction

Plz Help!! True or False

Nations from Central Europe and Eastern Europe are part the European Union

A speed of 220 feet per minute is equal to how many miles per hour?

Suppose you work for the Wholesome Hamburger Company. You own a 100 fast food restaurants in California. There is a big drought and people are being told to use less water. You know that it takes: 1,800 gallons of water to produce one pound of beef, 12 gallons of water to produce a head of lettuce, 2 gallons for one walnut, and 468 gallons of water to produce a pound of chicken. You discuss this with the executives in your firm and they tell you that the way water is allocated by government, the company does not incur any additional expense: water will remain very cheap for business. The head of the company is soliciting ideas for its strategic plan for the future. What is the ethical dilemma or issue? What are the alternatives or possible courses of action? Identify at least 3 alternatives. What are your recommendations? In other words, of the several alternatives you identified, what do you think the company should do? What is your rationale for your recommendations? In other words, why do you recommend this course of action?

Analyze the effect of the French and Indian War and its aftermath on the relationship between Great Britain and the British colonies. Confine your response to the period from 1754 to 1776.

Which of the following statements best describes Abraham Lincoln's Reconstruction plans? A. He wanted to implement the Wade-Davis Bill.

B. He wanted to militarily occupy the Southern states to insure pacification.

C. He wanted to pursue federal charges of treason against ex-Confederates.

D. He wanted speedy readmission of the seceded states under the Ten Per Cent Plan.

After the presentation, you discover that you provided some inaccurate figures. In a few cases, you inadvertently overstated by more than 50 percent the use of mobile devices while watching tv. You immediately email the svps with the correct figures and explain what you think this implies about your recommendations. What aspect of credibility are you most demonstrating?

Mr. Ricardo bought a set of luggage that regularly sells for \$249.95. It was on sale at a discount of 30%. About how much was the discount?

If the green nitrogen base in the DNA model represents adenine, the blue nitrogen base COULD represent

A) adenine

B) guanine

C) thymine

D) uracil

Hospital records show that a certain surgical procedure takes on an average 111.6 minutes with a standard deviation of 2.8 minutes. At least what percentage of these surgical procedures take anywhere between 97.6 and 125.6 minutes?

Donald and Sara are surveying their neighbors about the community playground. Their questions, written on the survey, are below: Donald: How many times do you visit the playground in a month? Sara: Did you visit the playground this month? Who wrote a statistical question and why? Sara, because there will be variability in the responses collected

Donald, because every neighbor can give a different answer

Sara, because there can be only one answer to the question

Donald, because every neighbor will give the same answer
