

Someday this war will be over. Our names and deeds will be forgotten. But our glory will shine in the face of every man, woman, and child who loves our country and calls it by name, from now until the end of time. Follow me, and we shall end this war, and see the new dawn of our golden kingdom as the sun shines forth in spring." the Princess in "St. George and the Dragon" B. the Princess in "The Last of the Dragons" C. Mulan D. Robin Hood

St George and the dragon

How do you find the area of a triangle and please show examples

Explain the differences between the Enlightenment philosophies and the philosophy of Sir Robert Filmer

Which statement describes one of the important consequences of the Columbian exchange

Processors can be _____ or _____, which is an indicator of how much data the processors can handle at a given point in time, with the _____ processor being more powerful.

Which gas law states that the pressure of a gas decreases when volume is increased and the temperature is unchanged

Suppose there are 20 questions on a multiple choice test. If 25% of the answers are choice B, how many of the answers are not choice B

shows the prime factorization of 72? A. $8 \cdot 9$ B. $6 \cdot 12$ C. $2 \cdot 2 \cdot 2 \cdot 3 \cdot 3$ D. $2 \cdot 2 \cdot 3 \cdot 3 \cdot 3$

Background information: This passage discusses Guatemala's land reforms, which dictated that land would be taken from large landholders and given to the peasant class. Guatemala has become an increasing threat to the stability of Honduras and El Salvador. Its agrarian reform is a powerful propaganda weapon; its broad social program of aiding the workers and peasants in a victorious struggle against the upper classes and large foreign enterprises has a strong appeal to the populations of Central American neighbors where similar conditions prevail.—US State Department Official, 1953 According to the passage, who is being hurt by Guatemala's reforms? A. Honduras and El Salvador B. upper classes and foreign businesses C. the population of Central America D. the workers and peasants

Solve the following equation when $a = 3$ and $b = 2$. $5a^2 - 10b + 9b =$

Westerners who ruled territories directly denied the influence of natives because

Do we have to be respectful of other cultures? If yes/no, why?

What effect did the Mexican Cession have on the United States?

Write your answer as a fraction in simplest form $\frac{7}{16} \times 2$

information gathered from observing a plant grow 3 cm over a two week period would allow you to collect what?

There are 150 trees in the park. Mark noticed that 120 of them are maple trees. What percent of the trees are maple?

What is word processing

How does solar radiation affect sea surface temperatures as well as ocean currents? Students were asked this question by their instructor. Ms. Sanders displayed the map you see here. The colors of the map represent annual mean sea surface temperatures (SST). Students observed that the average ocean temperatures appeared to vary with latitude, warmest at the equator and coldest near the poles. Ms. Sanders agreed with the students and then posed this question. She displayed the image of the Gulf Stream ocean current.

The Gulf Stream originates near the southern tip of Florida and travels along the east coast of the United States and across the North Atlantic. South of Greenland, the Gulf Stream widens and slows, becoming a vast, slow-moving, warm current known as the North Atlantic Drift that passes over western Europe. Hypothesize about the climates of the two locations indicated in the top map, Newfoundland in Canada (left) and Scotland (right).

- A) As the Gulf Stream travels north, its warm waters cool and there is no great differences between the climates of the two locations.
- B) The warm Gulf Stream and its associated winds keep the climate of Scotland much warmer than Newfoundland even though they are at approximately the same latitude.
- C) Because the two locations are found at approximately the same latitude and both are in constant with ocean currents and sea breezes, we would expect them to have similar climates.
- D) The warm Gulf Stream has cooled considerably by the time it reaches the higher latitudes, causing condensation of evaporated ocean waters. We expect Scotland to have much more snow than Newfoundland.

Which showed that the economy was weaker than the stock market indicated during the 1920s?
