

What happened following the decision in **Brown v. Board of Education**?

Choose all answers that are correct.

A. All schools were integrated within the first year after the decision.

B. Most Southern communities refused to integrate schools.

C. Some communities closed their schools rather than integrate.

The correct answers are

B. Most Southern communities refused to integrate schools.

C. Some communities closed their schools rather than integrate.

A is incorrect because it took as much as 10 years for all schools to start integrating. The southern communities were so angry that many closed schools before they would let African-Americans educate themselves. Some still opposed it but eventually had to end the practice.

My answer would be,

B. Most Southern communities refused to integrate schools.

and

C. Some communities closed their schools rather than integrate.

How many of the planets orbit the sun in the same direction as earth does?

What groups did the Vietnamese Ly dynasty conquer?

Describe farming prior to the Agricultural revolution

High levels of cholesterol can first lead directly to _____. A. strokes B. arteriosclerosis C. heart attacks D. heart failure

Which statements correctly describe the inheritance pattern for the alleles that control blood type? Check all that apply.

1. IA is dominant.

2. IB is dominant.

3. i is dominant.

4. IA is recessive.

5. IB is recessive.

6. i is recessive.

What is 0.011 divided by 33

A proton and an alpha particle are momentarily at rest at a distance r from each other. They then begin to move apart. Find the speed of the proton by the time the distance between the proton and the alpha particle doubles. Both particles are positively charged. The charge and the mass of the proton are, respectively, e and m . The charge and the mass of the alpha particle are, respectively, $2e$ and $4m$.

Explain how absolutist forms of rule affected social and political development from 1648-1815

what is a treasury note? A. a government bond that is repaid in two to ten years B. a government bond that is repaid in three months to a year C. a government bond that can be issued for as long as 30 years D. all the enemy the federal government owes to bondholders?

How did economic depression lead some farmers to regard the new government as another form of tyranny.

Of all the independent trading cities in Italy, which city was the most influential in the development of renaissance ideas?

a satellite is orbiting Earth at a distance of 35 kilometers. The satellite has a mass of 500 kilograms. what is the force between the planet and the satellite

In the stanza above, what does Wang use the symbol of the carp to illustrate?

Use a percent proportion or equation to answer: 150% of what number is 24

Which of the following is not a key advantage provided by the exoskeleton of terrestrial arthropods? Prevents desiccation

Protects internal tissue

Provides mechanical support

Grows with the arthropod throughout its life

What message was portrayed by the Dutch style of houses? A. That doors needed to be dual in order to keep out roaming animals.

B. The home was to be constructed of the best materials to show your status.

C. They must be high off the ground to act as a protection from the elements.

D. Neighbors and friends should stop and take time to interact.

In the molecule, C_2H_4 , what are the atomic orbitals that participate in forming the sigma bond between the C and H atoms

Consider the following system at equilibrium. $2CO(g) + O_2(g) \rightleftharpoons 2CO_2(g)$ How will increasing the concentration of CO shift the equilibrium? a. to the right b. to the left c. no effect

1. [Home](#)
2. [More Solution](#)
